About the Organizer	The Academy for International Business Officials (AIBO) is an educational and training institution directly under the Ministry of Commerce of the People's Republic of China. Established in 1980, AIBO is located in Changping District, Beijing, about 30 kilometers from Beijing Capital International Airport. It boasts comprehensive infrastructure to provide services such as accommodation, catering, training and meetings for trainees. One of the main responsibilities of AIBO is to implement human resources development and cooperation projects, especially training courses for officials. The Academy serves as the main base for China's foreign aid training, offering both off-line and on-line training in China and overseas. Backed by the Ministry of Commerce and in close cooperation with China's top think tanks, research institutes and universities, AIBO brings together a large number of China's top experts and scholars to provide intellectual support for foreign aid training. It has developed a number of high-quality foreign aid training projects in the fields of trade and investment, international economic cooperation, governance and public management, which have proved to be fruitful. Since 1998, AIBO has successfully held over 2,500 training sessions for officials from developing countries (including 147 ministerial seminars), benefiting nearly 84,000 trainees from other developing countries around the world. AIBO will adhere to the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, and take the important concepts, including a community with a shared future for mankind, pursuing the greater good and shared interests, and sincerity, real results, amity, good faith, mutual benefit and inclusiveness, as strategic guidance and fundamental principles to be followed. It will facilitate the joint efforts in implementing major initiatives such as the Belt and Road Initiative (BRI) and the Global Development Initiative (GDI), and continue to help developing countries accelerate their development by sharing China's experience and programs. About the Project	Background: China is the world's second-largest economy and also the second-largest import market, boasting a large middle-income group and enormous market potential. Moreover, the Chinese market takes the initiative in opening up. At this point, China highlights the balanced development of trade, specifically, expanding imports while stabilizing exports. The series of activities themed "Sharing a Big Market, Exporting to China" launched last year represents China's proactive efforts to expand independent opening-up, actively increase imports, and promote balanced trade development. It is also an innovative initiative by China to expand the pie of cooperation with trade partners, and uphold the multilateral trading system and free trade. Going forward, China will make efforts on the mutual promotion of activities, supply-demand balance, and international interactions. We welcome more brands to come to China and offer high-quality goods and services to Chinese consumers. Purpose: This training program aims to enhance the understanding of "Export to China" among countries in the Americas and Oceania regions, assist these countries in further expanding high-level opening-up, actively respond to their concerns and appeals, and enhance the sense of

	gain of all parties through concrete actions. Content: The seminar lectures will mainly cover: an overview of China's national conditions and Chinese modernization, the governance philosophy of China's leaders, China's experience in the development of opening-up, and how to leverage China's trade and investment promotion policies to expand exports to China. Methods: Invite experts to deliver thematic lectures by topics; organize seminar exchanges between participants and experts as well as among participants; and arrange for participants to conduct on-site visits and exchanges to relevant institutions and enterprises in Beijing and other cities. (The above is the preliminary schedule, which may be adjusted according to the actual situation, and the final version will be provided upon arrival in China.)
